botgeen New York city and Brooklynice will be admitted the the bridge on this day with alled with montators admitted on tickets of invitation while on the elevated foot-

The great bridge has norm some fifteen years million of dollars - The engineer who drafted rov staplens, and to where its construction was the ted up to his un maily death, was Mr John A Roshing, who be it the suspension bridge at Conclumate Mr Roshling was the first of the long list of buman victims where the great bridge has awallowed up. His foot was nahed while supprintending his work in the summer of 150, lock jaw ensued and he died in great muny. He was succeeded by his ion, Washington A. Roebling who re-mained in charge of the great work until the present time, though so disabled some years e, by a fire in one of the cassions as to be unfit since for active supervision. Mr Roch hings original estimate of the cost of the work was \$10 800 m00 and there have been many and otherget c charges of exerciption; ing from the fact that the actual expends

thre reached \$15'00; 000. The charge does not seem to be in any measure sustained by the facts.

The towers over which the bridge called rinary 275 feet high divided at 118 feet above high water mark to admit the road had. The longith of the supporting cables first a chorage is all the road had. The longith of the supporting cables first a chorage is all the road had. The same of the supporting cables first a chorage is anotherage, is nowards of one inite and a quarter while the mair, span between tower Sheep 6 minbed in feetly reports 0.00 (1 calling the collection of the supporting cables first a chorage is not because of the supporting the collection of the supporting cables for an all others. The supporting the collection of the supporting calling the calling the collection of the supporting the calling the high water mark to admit the road had. The longth of the supporting cables from a schor long to anthorage, is nowards of one intie and a parker while the main span between tower and tower is 1545 feeter the longest span in the world. The ground plan of the bridge is as:

The ground plan of the bridge is as: world. The ground plan of the bridge is as follows. On either side is a carring way one follows. On either side is a carring way one for eastern travel and one for west run. Next insist of these costs two carrings way one insist of these costs two carrings are insisted as the following frames agas to command a magnitude conviction in grames agas to command a magnitude conviction on grames agas to command a magnitude conviction on the conviction of the magnitude conviction of the conviction of
